(V.A.T. Reg. No. 222 7985 47)

SEED DISTRIBUTION - DECEMBER 1992

NOTES:

1. All requests for seed should be made immediately on the receipt of the Journal to Mrs D. Pritchard, 11 Shaftesbury Avenue, Penketh, Warrington, Cheshire WA5 2DP.
2. Indicate your selection by underlining those required on the Distribution List. If more than one packet is required of a particular species, write the number of packets before the name.
3. If at all possible, you will receive seeds of your choice, but some species are available only in small quantities and substitutes may have to be sent. Indicate preferred alternatives by putting a tick against their names.
4. The Distribution List is your order form and will be returned with your seeds. Fill in your name and address in the space provided below. If in addition you provide a self-adhesive addressed label, this will enable the Seed Distributor to process your order more rapidly.
5. Because of the heavy initial demand and disruption of postal services over the Christmas period, no orders will be dispatched before the New Year. In any case allow 28 days for delivery before enquiring--interruptions to deal with enquiries while the seed distributor is packing orders only delay the work further!
6. Make cheques and postal orders payable to BCSS. Add 30p to the total amount for your order to cover postage and packing.
7. Overseas members should note the following: (a) Seeds will be sent by surface mail unless sufficient extra postage is enclosed to cover airmail rates. (b) Before placing an order, please satisfy yourself that the local Customs/ Import regulations permit entry of cactus and succulent seeds. The Society cannot be responsible for seeds which are confiscated. (c) Phytosanitary certificates cannot be supplied.
8. The seed offered is obtained from a number of suppliers and listed here under the names given by them. The Society cannot accept responsibility for incorrect names on the seed packets.
9. If you would like a copy of the Society's leaflet on seed raising, please tick box.

The seed list got off to a flying start this year when Geert Eerkens from Suriname donated 24 lots of *Melocactus* seed and *Mammillaria mammillaris*, mostly seed of known provenance, and we are grateful to him for his generosity. Other seed has been donated by Phillip Downs, Mike Field, Alan Phipps and Gill Evison, and to them also we say thankyou. The rest, apart from some chipped in by me, is from commercial sources.

Of course the seed would be of no use without packers, and again thanks are due to Allan Armitage, Dave Edwards, Jim Roskilly, Peter Burton and June Faulkner for their efforts. The Southport faithful have contributed much to the effort, Sid and Margaret Lee, Ann Williams, and Liz Drummond having done about half of the total seed between us, and Liz has again done all the listing and recording on her computer. To all these people we should be very grateful.

As I start my 10th year as seed buyer, I find it more and more difficult to find "choicer" seed, and any suggestions you might have would be welcomed. There are a few such seeds on the list this year, such as the Madagascan *Euphorbias* and *Pachypodiums*, along with *Didieria* and *Idria*. There are three *Bulbines* to satisfy a growing interest in this genus and a good selection of mesembs. There is also a fair selection of "Collector's cacti" for those with a few years left!

I hope you will find some seeds of interest to you, and that you will support the Society by buying it. How about buying some extra to give to the newer members of your branch?
